

STATISTICS 607 Sampling

Fall 2008

TEXT: *Sampling: Design and Analysis*, First Edition, Sharon Lohr
PREREQUISITE: An introductory course in statistical methods, e.g., STAT 601
or STAT 651

GRADING POLICY

Two tests will be given and the final exam will be comprehensive. All the exams will be in class and closed book. The two tests count as 60% (30% each) of your term grade. Homework assignments count 10%. The final exam counts as 30%.

Make-up of missed tests will be allowed only if I am notified of the University-excused absence before the test. A single make-up test will be given in the week before the final exam. This make-up test will be comprehensive.

Homework will be assigned, collected and graded regularly. **No late homework will be accepted.** Please turn in homework on the due date before the class starts. For on-campus students, questions about homework or exams will not be answered over the telephone or by email. You are encouraged to see me or the teaching assistant during our office hours or by appointment.

NOTES:

1. We will cover most material in Chapters 1–8 and some material in later chapters when time permits.
2. The two tests are tentatively scheduled to be on Oct 7 and Nov 11. The final exam is on Dec 10 (8–10 am).
