Dear Colleagues,

The Statistics Former Student Network (SFSN) Inaugural Webinar on Spatial Statistics will be on Wednesday, February 28, at 11:30 am Central Standard Time (CST), in Blocker 457, and will be given by Associate Professor, Mikyoung Jun, of the Department of Statistics at Texas A&M University. Click here to visit Dr. Jun’s web page for further information on her education and areas of research.

Register for the webinar by clicking here.

Upcoming webinars will be given by:

- Distinguished Professor Cliff Spiegelman (JFK Assasination and Lead Bullet Analysis)
- Associate Professor Huiyan Sang (Spatial Statistics)
- Professor Jianhua Huang with colleagues (Statistics in Astronomy), and
- SFSN Members.

Whenever possible, SFSN will try to webcast selected lectures and presentations (Hocking Lectures, Hartley Lectures, Parzen Lectures), given in the Statistics Department. You may find upcoming events by clicking here. The purpose of SFSN is to share knowledge, expertise and experiences of the former and current students of the Department of Statistics among with its members, thus enriching and extending their education and professional careers. Individuals who received degrees in statistics at Texas A&M University or are currently pursuing a degree from Texas A&M University, Department of Statistics are eligible to become members of SFSN.

SFSN is co-sponsored by the Association of Former Students (AFS) and Aggie Network, which AFS maintains. SFSN uses both the Aggie Network’s and the Department’s email database to communicate with our members. Both of these databases are incomplete and not up to date. Since we have not yet established one complete email database for communications with current and potential network members, some of you may receive this announcement twice and some former students will not receive it. Therefore, we need your help in disseminating this information to colleagues who may not receive this announcement.

Using the Aggie Network’s database, we have established a listserv for SFSN postings, online discussions and sharing of ideas. We encourage you to sign-up for the SFSN Lisetserv by replying to this email or clicking here. We need your active support and participation in SFSN activities to help make SFSN goals a reality. We invite you to apply for currently open positions on the SFSN Board and volunteer to give webinars in your area of interest or expertise.

To join the SFSN’s Inaguaral Webinar on Spatial on Monday, February 28, at 11:30 am (CST) online, please click here.

Click here for playback after the event.

Let’s use these great opportunities to make contributions to the knowledge of SFSN members.

Sincerely,

Ersen Arseven, Ph.D., ‘74
