E-MAIL ADDRESS: bmallick@stat.tamu.edu

OFFICE HOURS: TBA

TEXT: Methods and applications of linear models, regression and the analysis of variance by R.R. Hocking.

1. The handouts used in this course are copyrighted. By “handouts,” I mean all materials generated for this class including syllabi, exams, in-class material, and computer examples. Because these materials are copyrighted, you do not have the right to copy the handouts, unless I expressly grant permission.

2. There will be two midterms (25% each) and one final (35%). Examinations dates will be announced later.

3. Homeworks will be assigned regularly, and it will be turned in and graded. You should write up your solutions independently. Do not copy other students’ solutions or solutions from a solution manual.

4. If you are unable to take a test when scheduled because of illness, accident, or circumstances beyond your control, notify me by telephone before the exam is given. A make-up test will be scheduled as soon as possible.

   A grade of Incomplete (I) will be given only in the event that circumstances beyond your control were the cause of your missing class for an extended period.

5. Computing: We will use S-Plus as the programming language in the class.
