Univariate Data Analysis using INSIGHT

In INSIGHT, click on **Analyze** and then **Distribution (Y)**. Click on the response BREAK and then on Y. A variety of univariate analyses can be obtained. Here click on **OUTPUT**. For the attached graphs, make sure that all 3 graphs are checked. To get a density estimate, click on **Density Estimation** and then on **Normal** under Kernel Estimation. Finally click on **OK** to get the following output:
